DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Drawings

- 1. The drawings are objected to because of the following informalities:
- a. The drawings fail to comply with 37 CFR 1.84(p)(5) because they do not include one or more reference signs mentioned in the description. Note, for instance, "9" (disclosed as a "communicating passage" in line 12 of paragraph [0038], for instance).
- b. In FIG. 6, reference sign "57" should be drawn to the "head-shifting mechanism" in order to be consistent with the remainder of the disclosure.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), and/or an amendment to the specification in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/605,941 Page 3

Art Unit: 2652

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

- 3. The abstract of the disclosure is objected to because it is not "limited to a single paragraph on a separate sheet within the range of 50 to 150 words." Appropriate correction is required. See MPEP § 608.01(b).
- 4. The disclosure is objected to because of the following informalities:
- a. In line 17 of paragraph [0036], "stator 116" should be changed to --stator 16-- in order to be consistent with the remainder of the disclosure.
- b. In line 18 of paragraph [0037], "rotor 106" should be changed to --stator 6-- in order to be consistent with the remainder of the disclosure.
- c. In line 36 of claim 1, --a-- should be inserted before "radially inward portion" for better clarity.
- d. In line 2 of claim 2, "at least one of" should be deleted as only one choice follows this phrase.
- e. In line 3 of claim 4, --a-- should be inserted before "radially outward portion" for better clarity.
- f. In line 10 of claim 4, --an-- should be inserted before "edge portion" for better clarity.

Application/Control Number: 10/605,941 Page 4

g. In line 43 of claim 5, --a-- should be inserted before "radially inward portion" for better clarity.

- h. In line 2 of claim 6, "at least one of" should be deleted as only one choice follows this phrase.
- i. In line 3 of claim 8, --a-- should be inserted before "radially outward portion" for better clarity.
- j. In line 10 of claim 8, --an-- should be inserted before "edge portion" for better clarity.

Appropriate correction is required.

5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections/Considerations - 35 USC § 103

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 10/605,941 Page 5

Art Unit: 2652

Pertinent Prior Art

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This includes Tokunaga et al. (US 2003/0230943), which teaches a spindle motor comprising a communicating passage formed in a bearing member so that one end of the communicating passage opens on a thrust bearing section radially inwardly therein and so that axial end bearing clearances formed between a bearing hole and shaft communicate through the passage to balance pressure within the bearing clearances.

Allowable Subject Matter

8. Claims 1-8 are allowable over the prior art of record. The prior art of record does not teach nor suggest "an annular protruding portion being formed on at least one of the end face of the bearing member and the flat face of the rotor at [a] radially inward portion of the thrust bearing section" in addition to the specifics of the shaft, bearing member, rotor, bearing clearances, thrust bearing section, radial bearing section, and communicating passage.

Conclusion

9. Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.
